

Name - Chrystal Schlenker  
Phone - 585-705-0550  
Address - 20 Brewerton Dr, Rochester, NY 14624

**How many years have you lived in the district?** 8 years

**What is your Occupation?** Lead Customer Success Manager C

**Do you have children attending Churchville?** Our oldest, Mckenzie is currently a 6th grader in the Middle School, Noah is in 2nd grade at Chestnut Ridge and Dakota is a 1st grader at Chestnut Ridge as well.

**Please list your contribution to or involvement in the community and community service you have done.**

Our family regularly attends most community events and are involved in school activities as often as we can. School plays, band, festivals, football, spirit week, and the color run are some of our favorites where we enjoy participating, as well as volunteer in! We also attend a local dance studio and host movie nights at our home during the summer months to get the kids and families together whenever we can.

**Why do you want to be a school board member?**

As a parent and community member, I have a personal interest in the planning of our children's future. With a diverse background and upbringing, as well as an entrepreneurial and business background, I bring a perspective that represents a variety of families and family dynamics. I also bring experience and knowledge from outside of the education establishment to add insight to the decision-making process of our schools and students.

**What do you think are the two top issues facing CCCSD?**

I think one of the biggest issues at the top of everyone's mind right now is the continued planning and decision-making of what is to come in the Fall during the COVID-19 pandemic as the regulations continuously change. It will be important to consider the diverse family dynamics throughout that planning and continue working towards finding solutions that will meet the needs of as many families as we can and most importantly, understand the impact these plans have on our students. Another top issue I see facing the schools is going to be the continued effort to work towards meeting the standards we have set forth for our students including curriculum, application of real-world learning, individualized learning, and for our teachers to continue professional development in order to learn and apply new techniques throughout the district. This past year has definitely impacted these standards and will take some time to reach again.
